

2009 Holiday Greetings From Numatic Engineering!

Enjoy Our Special Holiday Video Here:

Happy Holidays!

It's hard to believe we're at the end of 2009. Numatic Engineering has been in business more than 50 years, and we've never seen a year like this one.

But adversity is a test of character, and this year has forced us all to re-evaluate what we do and how we do it. For Numatic Engineering, the result is a leaner, stronger operation focused on improved service and added value.

The same is true of our clients, many of whom made impressive leaps forward in their knowledgebase and resulting products. We count it a privilege to have partnered with you as you developed new solutions and achieved new innovations. And, we look forward to continued success in 2010!

On behalf of everyone at Numatic Engineering, I wish you and your family a warm and wonderful holiday season.

All the best,
Steve Leach

About Numatic Engineering

With fifty years experience as the premier resource for automation controls, from kitting to control system design and fabrication, Numatic Engineering's complete line of services is aimed at supplying quality, cost-effective solutions for your every need.
